# IVICA MARKOVIKJ

## ABOUT ME

I am an experienced photographer prepared to switch profession and become part of the IT world.

The challenging Covid 19 times made me start exploring other career paths. I was amazed by the growth in the digital and e-commerce sector during the pandemics which made me inspect the job opportunities in the IT world. I quickly realized that I could use my fine knowledge of photoshop and image editing into the field of Web Design. That is when I began the process of self-learning for becoming a great Web Developer.

I am curious and dedicated to everyday learning. I do it mostly by reading, watching videos and following online courses. I am now looking for an opportunity to start my career in the IT industry, use all the knowledge I gained in the past 7 months and continue improving and advancing my skills. I am keen to learn from proven experts in the area. I am eager to see how projects are delivered within a company and make my own contribution to it by applying my current skills and the ones I am about to gain during the process.
